

## "CONDITIONS OF PERMIT"

1. The Applicant presents and agrees, in writing, to:
  - a) Implement an acceptable method to prevent particulate matter from becoming airborne. (Application of water with water truck or sprinklers, windscreens, speed limits, etc.)
  - b) Take additional precautions as reasonably prescribed by the Air Quality Management Division (AQMD), consistent with the provisions of Section 040.030 of the District Board of Health Regulations Governing Air Quality Management.
  - c) Suspend all or part of the activities that relate to or may contribute to a violation of Section 040.030 of the Air Quality Regulations, if satisfactory control of airborne particulate(s) cannot be provided, or upon request by the AQMD (i.e. high and/or adverse wind conditions).
  - d) Prevent any open burning which shall include, but is not limited to, open fires for disposal of trash, hand warming, etc.
  - e) Suspend all or part of the activities upon notification by the AQMD that an Air Pollution Emergency exists, until the termination of the Emergency condition.
  - f) Implement an acceptable method of soil stabilization when the project is finished.
2. The Applicant agrees to pay particular attention to the following conditions and/or areas:
  - a) Unimproved access roads used for entrance to or exit from the construction site.
  - b) Areas in and around building(s) under construction.
  - c) Dirt and mud deposited on adjacent, improved streets and roads resulting from the construction, that could result in a dust problem.
  - d) Restrict vehicles and equipment use on and around the construction site, including reducing the speed limit to prevent the generation of airborne dust.
  - e) Roads that are disturbed, removed, etc., resulting from construction.

## "RESPONSIBILITIES OF APPLICANT DURING CONSTRUCTION"

3. The Applicant is responsible for:
  - a) All dust control **24 hours a day, 7 days a week, including weekends and holidays**, from commencement of project to completion.
  - b) If required, obtaining an NPDES permit addressing water quality issues related to storm run-off. The Nevada Division of Environmental Protection issues this permit. Contact (775) 687-9418 for further information.
  - c) Ensuring a Dust Control Permit is available on site. The site is subject to the right of inspection by an Air Quality Specialist at any time. If the **Specialist** ascertains that a present or potential dust particulate problem exists, specific conditions may apply.
  - d) Problem areas or potential problem areas, which may be pointed out by the Air Quality Specialist, must be controlled as soon as possible after being brought to the attention of a responsible individual in the employment of the **Applicant (Owner/Operator)**, Prime Contractor, or Grading/Excavating Contractor.
  - e) Notification to the Air Quality Management Division (784-7200) when there are transfers or additions of ownership or grading/excavating contractors, from commencement of project to completion.
  - f) Submittal and approval of a new Dust Control Permit, **prior to the expiration date**, if the project is not complete, and the remaining land disturbance is one acre or greater. The Dust Control Permit is valid for eighteen (18) months from the date the Permit is issued.

## "RESPONSIBILITIES OF APPLICANT UPON COMPLETION OF CONSTRUCTION"

4. Stabilization of the area is required once "final grade" is complete, by construction/landscaping, revegetation, chemical sealant, or other approved method(s) of dust suppression.
5. **Submit Notification of Completion to the AQMD, PO Box 11130, Reno NV 89520-0027 or faxing the "Completion of Project" form (attached) or located at [www.ourcleanair.com](http://www.ourcleanair.com) to (775) 784-7225.**
